### Assign specific Decodable Readers

For this, use the *Reading Groups* feature!

On the *Reading Groups* page, you'll find the **Decodable Library** underneath the **Levelled Library**.

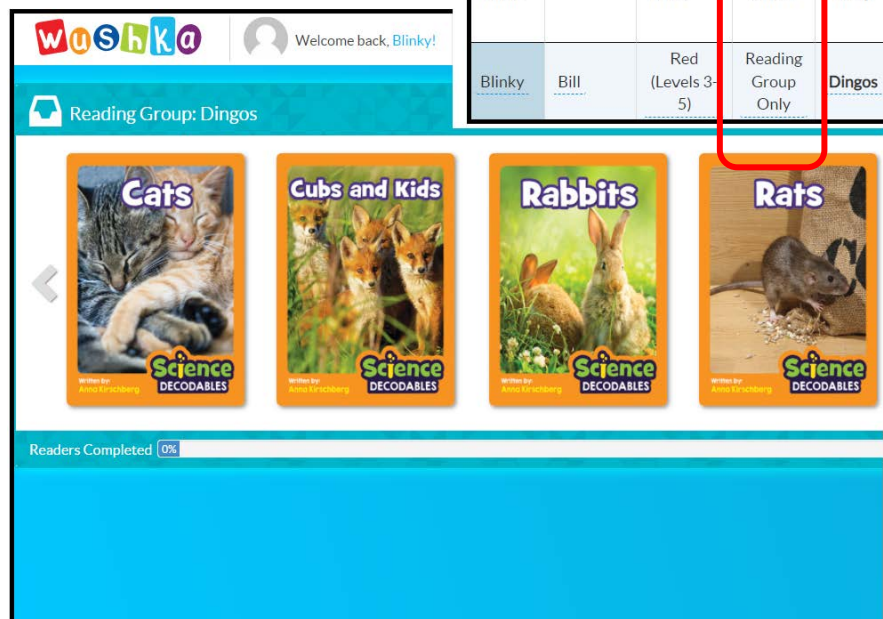

You can select any specific Decodable Readers which you'd like, to allocate to your groups.

Psssst - On the *Manage Class List* page, make sure that the **Reading Group Permissions** setting is switched to *On*.

If you'd like these Decodable Readers to be **the only books your students can see** on their Wushka accounts, then change the **Level Access** setting to *Reading Group Only*.

First Name	Surname	Reading Level	Levels Access	Reading Group	Reading Group Permissions
Blinky	Bill	Red (Levels 3-5)	Reading Group Only	Dingos	On

**Give your students access to an entire Decodable Phase**

The Decodables Library loosely correlates to the Levelled Library.

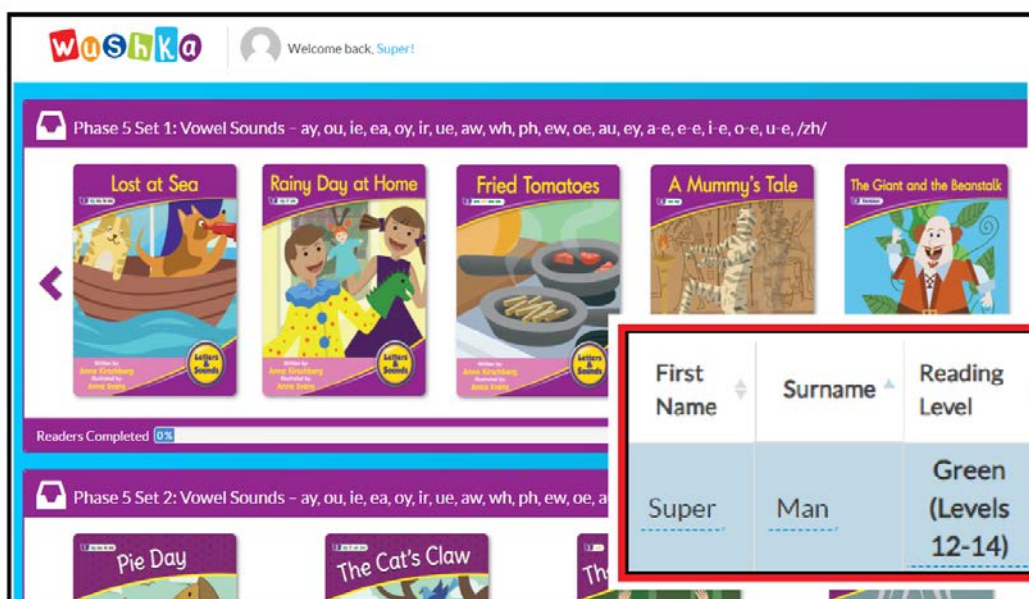

**Decodables Phase**

**Levelled Library Level**

Phase 1	Magenta
Phase 2	Magenta & Red
Phase 3	Red & Yellow
Phase 4	Yellow & Blue
Phase 5	Green & Orange
Phase 6	Turquoise & Purple

Whichever **Reading Level** the student has **access** to, they will also be able to access the **correlating phase** in the Decodable Library.

Eg: This student has access to the Green Level, so Phase 5 appears in their Decodable Library.

First Name	Surname	Reading Level	Levels Access
Super	Man	Green (Levels 12-14)	Reading Level Only

First Name	Surname	Reading Level	Levels Access
James	Firth	Blue (Levels 9-11)	All Levels

**Keep in mind:** Even though this student has their Reading Level set to Blue, they will be able to see **all Decodable Phases**, because their **Level Access** is set to **All Levels**.
